

Advanced Technologies & Computer Science Collection

Advanced Technologies & Computer Science Collection provides comprehensive full-text access to scholarly journals, trade and industry publications, magazines, technical reports, conference proceedings, dissertations, and government documents from around the world. It covers a wide range of topics, including aeronautics, astronautics, AI, communications, computer and information technology, electronics, lasers, solid-state materials, space sciences, and telecommunications.

Key benefits:

Premium scholarly journals

Over 1,200 journals with ongoing full text from publishers such as Springer-Nature, Emerald Group, Cambridge University Press, MIT Press, and many more.

Authoritative, multiformat content

A wide variety of content types including trade publications, industry journals, news sources, conference proceedings, and other research materials.

Reliable, high quality A&I

Interdisciplinary A&I broadens and deepens coverage from important engineering societies and publishers such as IEEE, American Institute of Aeronautics and Administration (AIAA), SAE, and Wiley.

What can users do with the Advanced Technologies & Computer Science Collection?

- **Search efficiently:** The user interface empowers researchers to conduct thorough searches with precision and speed.
- **Access content:** A wide range of sources, including journals, conference proceedings, dissertations, reports, and more.
- **Gain insights:** Web of Science citation counts in the ProQuest Platform aid discovery and assessment to help users quickly locate key papers on topics of interest, and stay up to date with the latest research.
- **Find full text:** Researchers gain immediate access to thousands of full-text titles and essential content sources identified during the search process.

Broad Coverage:

- Advanced Materials
- Aerospace
- Artificial Intelligence
- Biotechnology
- Energy
- Quantum Computing
- Robotics
- Space Sciences

The Advanced Technologies & Computer Science Collection is part of ProQuest One Applied & Life Sciences which also includes Materials Science Collection, Biological Science Collection, and Engineering Collection.
