

Biological Science Collection

Researchers can access more than 1,600 peer-reviewed journals with full-text availability from leading life science publishers, including Nature, Elsevier, Cambridge University Press, and Springer-Nature. This extensive resource provides comprehensive coverage across biological disciplines and interdisciplinary fields, ensuring that users can find the answers they need for their research. Additionally, the Biological Science Index integrates MEDLINE with ProQuest-curated content, creating a powerful tool for life sciences research and discovery.

Key benefits:

Premium scholarly journals

1,600+ journals with ongoing full text from publishers such as Nature Publishing, Elsevier, PLOS, Cambridge University Press, Springer-Nature, and many others.

Authoritative, multiformat content

A wide variety of content types including trade publications, industry journals, news sources, conference proceedings, and other research materials.

Reliable, high quality A&I

Interdisciplinary A&I broadens and deepens coverage from important societies and publishers such as AAAS, American Chemical Society, Wiley, Taylor & Francis, and the American Society for Microbiology.

What can users do with the Biological Science Collection?

- **Search efficiently:** The user interface empowers researchers to conduct thorough searches with precision and speed.
- **Access content:** A wide range of sources, including journals, conference proceedings, dissertations, reports, and more.
- **Gain insights:** Web of Science citation counts in the ProQuest Platform aid discovery and assessment to help users quickly locate key papers on topics of interest, and stay up to date with the latest research.
- **Find full text:** Researchers gain immediate access to thousands of full-text titles and essential content sources identified during the search process.

Broad Coverage:

- Biochemistry
- Biophysics
- Biotechnology
- Botany
- Computational Biology
- Ecology
- Genetics
- Molecular Biology
- Parasitology

The Biological Science Collection is part of ProQuest One Applied & Life Sciences which also includes Advanced Technologies & Computer Science Collection, Materials Science Collection, and Engineering Collection.
