

Health & Medical Research Collection

Essential Medical Information Across All Clinical Disciplines

The Health & Medical Research Collection combines MEDLINE with full-text biomedical, healthcare, and life sciences research materials. Within users will access peer-reviewed journals, trade publications, reports, and a curated selection of popular sources. Students, faculty, and practitioners use this database to keep up with the latest developments in clinical research, access full-text journal articles, get clinical decision support, explore research topics, and more.

4,000 scholarly journals in full-text

A wide range of publishers including Elsevier, Springer, Nature Publishing, and Cambridge University Press. Includes prominent titles like *The New England Journal of Medicine* and *The Lancet*.

Key A&I

Integrates A&I databases like MEDLINE®, the U.S. National Library of Medicine's premier bibliographic database with more than 39 million references.

Essential grey literature

Uncover the latest academic research in reports, working papers, conference papers and proceedings, dissertations, trade publications, and other hard-to-find content.

The Health & Medical Research Collection contains the following databases:

Full text databases:

Consumer Health Database: Includes over 350 full-text publications covering a wide range of subjects from sports injuries to women's health, including pandemics, disaster preparedness, and obesity.

Healthcare Administration Database: Designed for health administration researchers, it covers hospitals, insurance, law, statistics, business management, ethics, and health economics.

Medical Database: More than 1,400 full-text publications covering major clinical and healthcare disciplines.

Public Health Database: Designed for public health research, it offers access to over 800 publications, covering biostatistics, environmental health sciences, epidemiology, health services administration, and more.

Health & Medical Collection: Offers peer-reviewed journals, dissertations, preprints, reports, popular sources and other research materials across biomedical, health fields, and related disciplines.

A&I databases:

MEDLINE: The U.S. National Library of Medicine's premier bibliographic database with more than 39 million references.

ComDisDome: Covers communications disorders literature, focusing on speech-language pathology and audiology, connecting reliable information and researcher profiles.

Sports Medicine & Education Index: Since 1970, it covers physical education literature, including sports medicine, kinesiology, and health education.
