

Statistical Insight Collection

Authoritative global statistics advancing social science research

Statistical Insight Collection is an essential resource designed to empower researchers by providing them with easy access to key data and statistics. This valuable collection facilitates in-depth understanding, analysis, and contextualization of topics spanning a wide spectrum including business, economics, environmental studies, international relations, political science, public policy, sociology, and beyond.

Statistical Insight Collection provides over 960K downloadable tables and 275K reports from authoritative government and private sector sources worldwide. The sources of data include U.S. and State government agencies, foreign governmental organizations, international organizations, research organizations, commercial publishers, and universities.

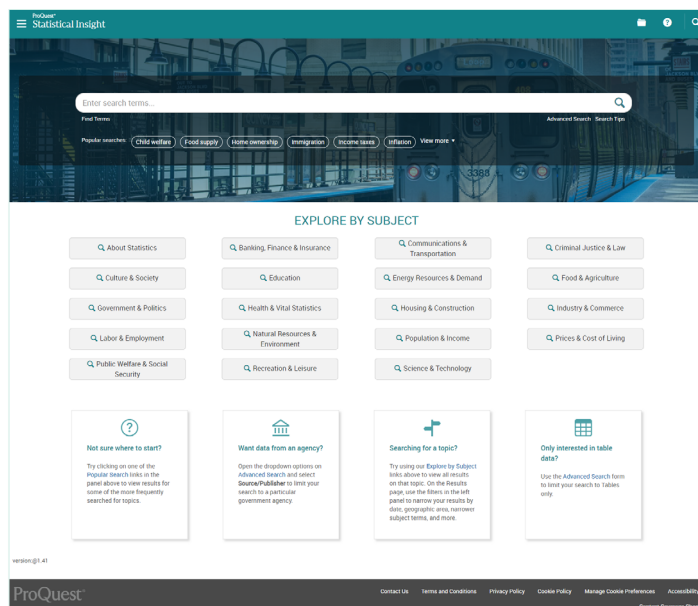

Updated Interface

Statistical Insight has a new look and feel, plus some new features to help novice users explore the collection. Updates include:

- **Popular Searches:** Options for popular searches can be initiated from the homepage with ease.
- **Explore by Subject:** Browse subjects from the homepage to retrieve results with the option to narrow further. The subject category options provide a comprehensive overview of the economic, social, and political topics important to the U.S. and countries around the world. These subjects lead to the

data and statistics necessary to understand, analyze, and contextualize the topics important to our societies, cultures, and governments.

- **Research Starters:** Also included at the bottom of the homepage are search suggestions for topics to start research, how to search specific sources such as an agency or how to search tables only.

Major subject categories include:

About Statistics • Banking, Finance, and Insurance • Communications and Transportation • Criminal Justice and Law • Culture and Society • Education • Energy Resources and Demand • Food and Agriculture • Government and Politics • Health and Vital Statistics • Housing and Construction • Industry and Commerce • International Relations • Labor and Employment • Natural Resources and Environment • Population and Income • Prices and Cost of Living • Public Welfare and Social Security • Recreation and Leisure • Science and Technology
